

## Attachment No. 8

10 May 2007

### NAVAIR STANDARDIZATION REPORT TO THE CE 2.0 COMMITTEE

#### 1. Conversion of existing military documents to SAE standards.

A. MIL-C-81659/SAE-AS81659 Electrical Connector Specification. A group cancellation notice and adoptions for each superseding SAE-AS81659 standards have been dated and are being submitted to the ASSIST for publication. The existing QPL, QPL-81659 has been reformatted and be replaced by QPL-AS81659. This was strictly a formatting exercise with no changes in the part number listings.

B. MIL-C-85028//SAE-AS85028. Electrical Connector Specification. Coordination of the cancellation notices for SAE-AS85028 and associated specifications and adoption notices for the corresponding SAE-AS85028 has been completed with no negative comments being received. The QPL has been revised and converted to QPL-AS85028. QPL-AS85028 has been approved by the NAVAIR qualifying activity. With all of this having been completed, I anticipate sending the dated notices and QPL-AS85028 in the next couple of weeks.

2. QPL revisions. New revisions for QPL-5015 and QPL-39029 which incorporate the outstanding approval letters from the NAVAIR qualifying activity have been approved and will be published shortly. Since the last meeting there has been an increased effort to update some of the older NAVAIR's QPLs. With that in mind, draft revisions QPL-29600 and QPL-81511 (Electrical Connectors Qualified Products Lists) have been prepared and sent to the NAVAIR qualifying activity for approval. QPL-AS21608 (Shield Terminating Ferrule) has been approved by the NAVAIR qualifying activity and will be published in the near future.

#### 3. Specification revisions.

A. Revisions of MIL-T-81306 and MS90387. Strap tools were dated 30 January 2007 and have been posted on the ASSIST website.

B. MS27488 revision. A revision of MS27488 Sealing Plug will begin coordination soon. This revision will be to address problems with excessively long plugs.

Respectfully Submitted,

Dwight Tabit
