6. Identify the stakeholders (e.g., telecom, consumer, medical, environmental, etc.) likely to be directly impacted by the standard:	Electrical, electronics and telecommunications industry.	
7. This PINS revises a previous PINS submittal:	Note: A revised PINS is only required if the previously identified stakeholders have changed substantively (see item 6 on this form.).	
8. Description of Contents of Standard: (Provide a one paragraph description, not to exceed 500 characters.)	This standard establishes the test procedures and test sequences to be followed when evaluating the performance of electrical connectors and sockets used in controlled environments. Furthermore, it applies to contacts operating under low level circuit conditions. The assumption is made that the contacts are metal. Polymer contacts, or other contact types, may require a different test methodology.
