

**WORLD RESISTOR TRADE STATISTICS (WRTS)
Reporting Instructions For
WORLD RESISTOR SHIPMENTS — North American REGION SHIPMENTS SUMMARY
MS-475-Q**

DATE DUE: Due at EIA/ECA 45 days following the reporting period.
(Example: May 15th for the quarter ending March 31st)

SEND TO: Upload data at <https://secure.verisconsulting.com/eca/>

GENERAL:

Data for this report is consolidated and included in the World Resistor Report, a program of the World Resistor Trade Statistics (WRTS) organization. WRTS is composed of a representative of each of the participating trading regions (North America, Europe and Japan).

Include your shipments to world regions. Report the area of final sale, i.e., the location of the customer. Shipments to North America (U.S., Canada, Mexico, and Puerto Rico), Europe and Japan should include direct OEMs/Distributors. Shipments to ROW (Rest of World) should include direct-customer and inter-company transfers (shipments to your own overseas facilities). Report transfers at the resale value (invoiced price to customer)--not the transfer price (value at which your resistors are transferred to your foreign subsidiary/parent company for foreign distribution).

Europe, Japan and North America compile shipment data in this format. An estimate is developed for Rest of World (ROW) shipments.

All data should be rounded to the nearest thousand (omit 000).

TRADING REGIONS:

For the purposes of this report, the world trading regions are defined as follows:

North America:

Canada	Guam	Howland Island	Palmyra Atoll
United States	American Samoa:	Jarvis Island	Wake Island
